Conventional HealthCare System Model

Building process is expensive , requires 2-5 years and it still has geographic barriers

1

Purchase Land & Construct Building

2

Buy Equipment , Build Ancillary Services

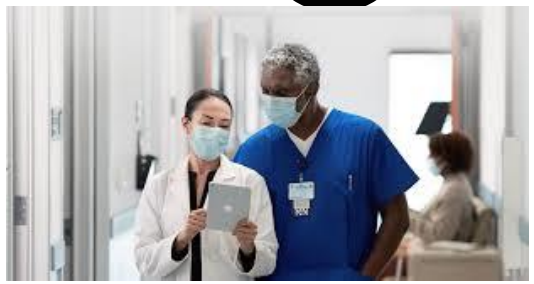
3

Staffing, Physicians, Insurance Credentialing

4

Establishment of Specialty Clinics and Departments

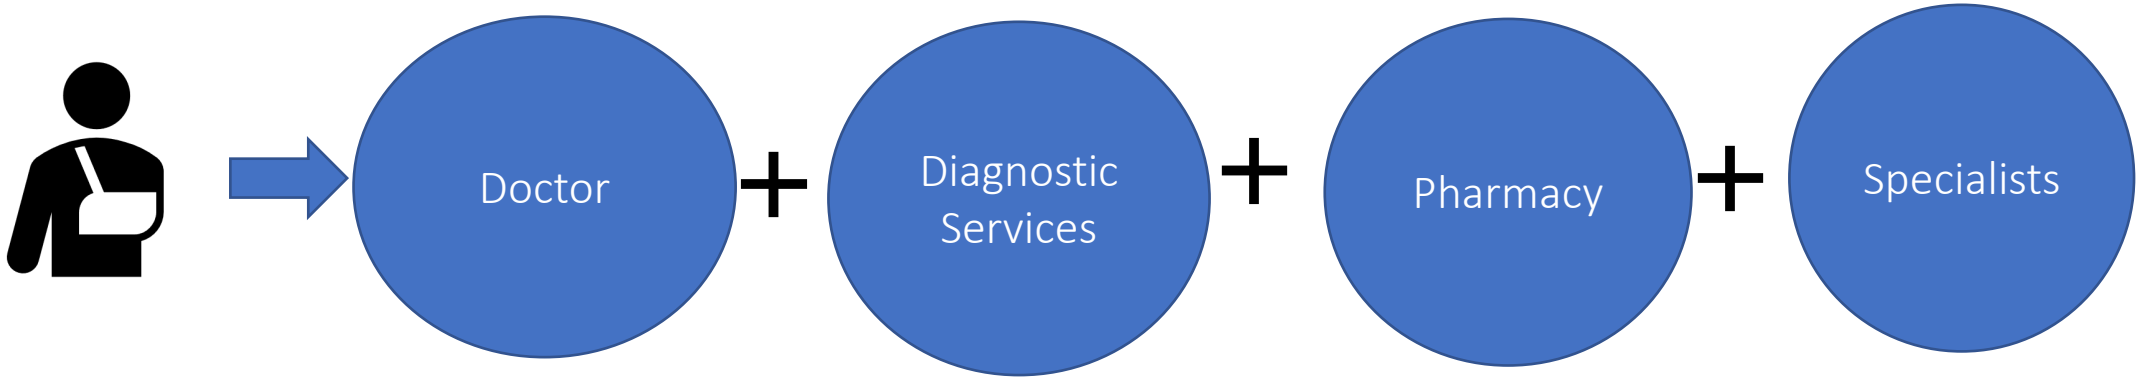
5



Start of Services

Problems with Conventional HealthCare Delivery Model

Patient has to visit in-person for each service



Challenges for all (Patients, Providers, Facilities and Payors), especially senior citizens and their family members:

CURA4U
One Stop Healthcare

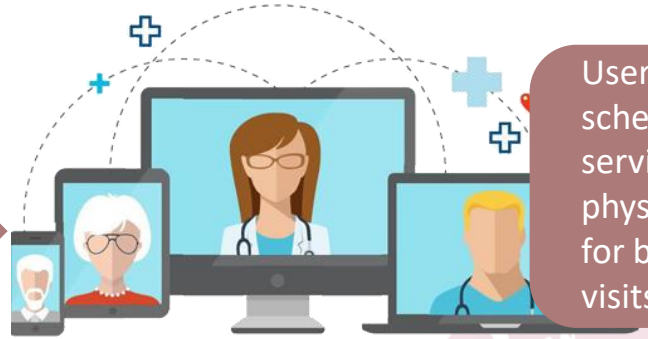
CURA4U –Marketplace App

How it works

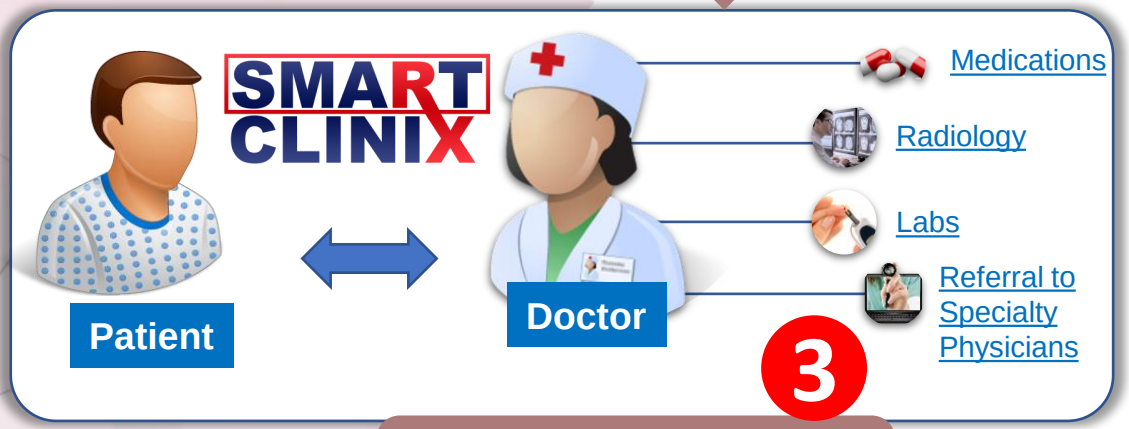
1

Patients or family members use Cura4U for searching and booking of Healthcare services with price transparency. Patients can also call our customer center.



2

Users pays online for scheduling of healthcare services (labs, radiology, physicians' appointments for both office and online visits



3

All orders/scheduling requests are processed. Patient receives services

4

Results are shared online with both patients and providers. Patients also get education materials

CURA4U Business Model

CURA4U Contracts with Quality HealthCare Providers (Doctors, Labs, Radiology , Pharmacy, Homecare services etc) for listing of their services for Direct Pay with discounted cash prices and adds small fee for booking of the services.

Services are listed for users with price transparency and discounted rates

Direct to Patients

- Visitors
- Self Pay Patients
- Patients with high deductible or out of network insurance plans

Direct to Employers

- Small Businesses Employees
- 1099 Workers

Summary

- American TelePhysicians provides both physicians services (virtual) and virtual care IT solutions with remote patient monitoring, needed to build digital and virtual healthcare ecosystem
- We offer both B2B and B2C solutions.
- Our B2B technology solutions help healthcare organizations to go digital to improve patient experience, start virtual clinics, decrease cost and increase outreach.
- Our B2C technology enable patients to schedule and get all in-network services with price transparency and convenience.
- We are looking for partnerships in international healthcare markets
- Our partners can choose services and customized solutions based on their needs and growth plans.
